Identification of studies via databases and registers
Identification of studies via other methods
Identification
Records identified from 20 sources (n = 51,030):
Lens.org (n = 15,709)
Scopus (n = 14,500)
PubMed (n = 7029)
LILACS/BVS (n = 5243)
AGRIS (n = 2365)
CNKI (n = 1692)
Dimensions (n = 1555)
ScienceDirect (n = 1239)
Other 12 sources (n = 1698)
Records removed before screening:
Identical copies consolidated (n = 3070)
Duplicate records removed (n = 25,557)
Records identified from:
Citation searching (n = 23)
Screening
Records screened (n = 22,403)
Records excluded (n = 12,505)
Reports sought for retrieval (n = 9898)
Reports not retrieved (n = 4141):
Full text not obtained (n = 3959)
Full text was another work or truncated (n = 15)
Doubtful reports without the correct full text (n = 106)
Extraction-stage reports without the correct full text (n = 45)
Reports whose full text was another work, found at row verification (n = 2)
Excluded reports whose full text was another work, found at the re-reading (n = 14)
Reports sought for retrieval (n = 23)
Reports not retrieved (n = 7)
Reports assessed for eligibility (n = 5757)
Reports excluded (n = 2477):
Identification method not reported (n = 885)
Country of origin not identifiable (n = 414)
Not the target species, not disaggregable, or no isolate (n = 361)
Denominators not recoverable (n = 177)
Reference strains only (n = 168)
Review, editorial or abstract without data (n = 161)
Activity of new compounds only (n = 155)
Source not assignable to a compartment (n = 102)
Overlapping collection reported elsewhere (n = 17)
Industrial or biotechnological use (n = 15)
Duplicate record of the same publication (n = 15)
Testing method and criterion not reported (n = 4)
In silico only (n = 2)
Retracted publication (n = 1)
Reports assessed for eligibility (n = 16)
Reports excluded (n = 4):
Not the target species, not disaggregable, or no isolate (n = 3)
Identification method not reported (n = 1)
Included
Studies included in review (n = 3056)
Reports of included studies (n = 3292)
Reports with compartment data only (n = 1806)
Collections in a pooled estimate (n = 894)
